

# FO-FIB-100PT Series

## *Configurable CAN Bus Fiber Optic Converter(Point to point)*

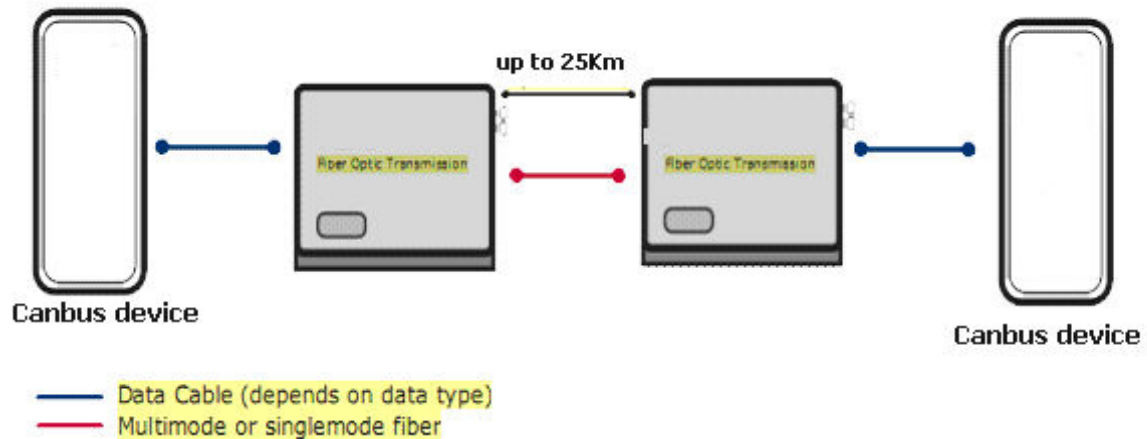

### Product Description

The FO-FIB-100PT CAN bus to fiber optic switch provide an optical point-to-point or bus network connection for CAN bus data interfaces on one or two, multimode or single mode optical fibers. The CAN bus fiber optic converter has 1 CAN port and 1 fiber optic port, CAN port is configurable via software. The Can bus series units support both CAN 1.0 and CAN 2.0B CAN standards and are transparent to all high level protocols. It can solve the problem of CAN bus's cascading problems, it can transmit 1MB data to 20km and the maximum is 6500 frames when it's up to 20km distance, so it is the most advanced CAN bus fiber optic converter.
